Experiment -1

AIM: To create an AWS free tier account to provision the resources.

Description:

Amazon Web Services (AWS) is a cloud computing platform that provides various services such as computing, storage, databases and networking. An AWS Free Tier account allows users to access AWS services within the applicable free usage limits. It helps students learn and practice cloud computing.

Steps:

1. Open a web browser (Chrome/Edge) and visit https://aws.amazon.com/free.
2. Click on Sign in to console.
3. Click on Create a new AWS account.
4. Enter your email address, password and AWS account name.
5. Click Verify email address and enter the OTP received in your email.
6. Select the Free (6 months) account plan and click Choose Free plan.
7. Enter your personal details such as full name, phone number and address.
8. Provide billing information using a debit/credit card or UPI.
9. Complete identity verification by selecting the required document and following the verification process.
10. Enter your mobile number and verify it using the SMS OTP.
11. Wait for AWS to complete the account setup.
12. Open https://console.aws.amazon.com/ and sign in using your registered credentials.
13. Verify that the AWS Management Console dashboard is visible.

Output: Successfully created and verified an AWS Free Tier account and accessed the AWS Management Console to provision cloud resources.
